

Ultimate AI Ad Creation Guide (2025)

Whether you're running campaigns for a startup or pushing digital products like you're doing on MercGen, this is how the pros are pumping out scroll-stopping content *without* needing a creative team.

STEP 1: Define Your Ad Concept Fast with AI

Before designing anything, nail down:

- **Hook:** What grabs attention? (Pain, desire, result)
- **Offer:** What are you selling and why should they care?
- **Target Audience:** Who's watching? (Be *ultra specific*)
- **Call to Action (CTA):** What do you want them to do next?

AI Tool Recommendation:

- **ChatGPT (with GPT-4o)** – Use this to write high-converting ad scripts, copy, and CTA ideas.
 - **HeyGen** – Generate full ad script + spokesperson videos with realistic avatars.
 - **Copy.ai or Jasper** – For rapid ad copy testing variations.
-

STEP 2: Generate Stunning Ad Images (Static Ads)

What you want:

- Clean layout
- Eye-catching colors
- Clear message + CTA

- Product visuals or concept images

Best Tools:

Tool	What It's Best At
Midjourney v6	Next-level photorealistic or styled product visuals
Ideogram.ai	Perfect for text-heavy ad images (like Instagram carousels)
Canva + Magic Media	Drag-and-drop design with AI-generated images
Adobe Firefly	Brand-consistent image generation with commercial license
Leonardo.Ai	Fast, unique ad mockups and concept visualizations

✅ **Pro Tip:** Use “prompt chaining” — first generate the product photo, then feed it into a mockup template using Canva or AdCreative.ai.

STEP 3: Generate Scroll-Stopping Video Ads

Formats that work:

- Short-form (6-30 seconds): Reels, TikTok, YouTube Shorts
- Mid-form (30-60 sec): Instagram/FB Video, YouTube Pre-roll

Best Tools for Video Ad Creation:

Tool	What It Does
Pika Labs	AI video generator (use a prompt or upload an image to animate)
Runway ML (Gen-3)	Full AI video creation from scripts or images
HeyGen	Talking avatar videos for testimonials, product intros
Veed.io + AI Tools	Edit AI-generated clips, add subtitles, effects
Descript	AI-assisted editing, text-to-video, voice cloning
Invideo AI	Script-to-video for TikTok-style content

✓ **Pro Tip:** Combine ChatGPT for scripting + Pika or Runway to animate scenes + Veed or Descript for final polishing.

STEP 4: Optimize & A/B Test Your Ads

You don't need 1 perfect ad. You need **10 variations** to test.

What to vary:

- Hook (first 3 seconds for video)
- Visual Style (color, layout, model/avatar)
- Copy (headline, CTA)
- Length

Tools for fast variations:

- **AdCreative.ai** – Generates 10+ image ad variations for you
 - **Marpie** – Automates A/B testing visual components
 - **CopyMonkey** – Creates ad copy versions optimized for marketplace/product ads
-

BONUS: Automate Your Ad Creation Workflow

Set up an **AI Ad Machine**:

1. **Idea & Script:** ChatGPT / Jasper
2. **Visuals:** Midjourney + Canva
3. **Video:** Runway + Veed
4. **Distribution:** Schedule with Metricool, Buffer, or repurpose using Repurpose.io
5. **Tracking:** Use Hyros or Triple Whale for performance tracking if you're scaling

Templates to Kickstart

Prompt to create an image ad in Midjourney:

css

CopyEdit

"A modern, eye-catching image ad for a mobile app that helps users lose weight fast, featuring a sleek UI phone mockup in center, soft yellow gradient background, bold headline that says 'Drop Kilos Without Diets', clean typography, high-contrast CTA button – photorealistic, aesthetic, Instagram style"

Prompt to generate a short video ad in Runway:

pgsql

CopyEdit

"Create a 15-second TikTok-style video ad for a weight-loss mobile app. Start with bold text: 'Lose Fat Without Diets'. Show animation of a phone app interface with weight tracker. Add upbeat music, fast cuts, and bold on-screen CTA: 'Download Now'. Modern, fun, energizing."
