Introduction

Congratulations on your purchase from MercGen! You now own a powerful, ready-to-deploy digital business. Whether it's a mobile app, web app, or full SaaS platform — it's **already equipped with monetization features built-in**, like:

- Subscription systems
- One-time payment options
- Freemium upgrades
- Affiliate referral structures
- And more

All MercGen apps are **pre-configured to help you make money from day one** — now it's just a matter of choosing how you want to scale.

This guide will show you **10 smart and proven ways** to monetize your product, so you can turn your purchase into profit.

1. Activate Built-In Monetization Features

All MercGen apps are optimized for monetization out of the box.

This includes:

- Stripe or Paddle integration for payments
- Freemium user tiers
- In-app upgrades
- Paywall for premium content or tools

→ Just connect your Stripe account, set pricing, and you're live.
No coding needed. No plugins required. Just launch.

2. Launch with Monthly or Yearly Subscriptions

Best for: SaaS, Web Apps, AI Utilities

Build recurring revenue by offering your product as a **monthly or yearly plan**. You can keep a free tier or trial and lock premium features behind a paywall.

Example:

You purchased an AI document generator → Let users generate 3 documents free, then upgrade for \$19/month for unlimited access.

3. Sell Lifetime Access or One-Time Plans

Best for: Niche Tools, Small Utility Apps, AI Tools

Create urgency and instant revenue by selling one-time licenses or lifetime access deals. This strategy works especially well when launching on:

- AppSumo
 - Deal sites (e.g., StackSocial)
 - Gumroad or LemonSqueezy
-

4. Rebrand and Resell to a Specific Audience

Best for: All MercGen Apps

Every app from MercGen comes **white-label ready**, so you can:

1. Add your brand
2. Customize visuals
3. Change app name, colors, and domain

Then resell it to a specific niche — like realtors, coaches, freelancers, restaurants, etc.

You're not just launching an app — you're launching a niche business.

5. Sell the App as a Monthly Service (DFY Model)

Best for: AI Tools, Lead Generators, Chatbots, CRM-style apps

Skip user onboarding entirely and sell **Done-For-You services** powered by your app.

Example:

You bought an outreach automation tool →

Offer “\$300/month Lead Gen Services” using your app on the backend.

6. Run a Viral Launch on Product Hunt or Indie Hackers

Best for: SaaS, Unique Tools, Creator-focused Platforms

Use our included **landing page and viral assets** to launch on:

- Product Hunt
- Hacker News
- Indie Hackers

→ This can drive thousands of visits and free traffic if done right.
Add a discount code for launch users to drive quick conversions.

7. Use Content Funnels to Drive Leads

Best for: Any app

Use:

- YouTube tutorials
- TikTok short demos
- AI-written blog posts
- Newsletters

→ All content points to your landing page with a clear CTA.

MercGen includes guides for social media hacks and email marketing to help you.

8. Build a Bundle and Upsell

Best for: Multi-product owners

If you bought more than one app on MercGen, bundle them into a higher-value offer.

Example:

You own:

- A chatbot tool
- An AI blog generator
- A landing page builder

→ Bundle them into a “Business Starter Kit” for \$499.

Offer each separately, but use bundles to upsell.

9. List on Digital Marketplaces

Best for: Utility Apps, Niche Tools, AI Generators

You can rebrand and list your product on:

- Gumroad
- LemonSqueezy
- Etsy (for digital tools)
- Flippa (resell it as a micro-SaaS)

Pro Tip: Position it as “your own product” — because it is.

10. Build a Community and Monetize It

Best for: Fitness, learning, creator apps, AI tools

Start a:

- Facebook group
- Discord server
- Skool community

Then monetize by offering:

- Premium memberships
 - Exclusive access to features or content
 - Coaching, consulting, or live workshops using the app
-

Conclusion

Every MercGen product comes with **built-in monetization power** — your app is not just functional, it's designed to make you money.

Start with one or two strategies above, take action fast, and scale up over time. And remember — you're never alone.
